18 Whole Spices | 10 Ground Spices | Psyllium Husk | Heat-treated option

A MESSAGE FROM THE FOUNDER

Welcome to a Partnership Built on Purity, Precision and Promise

AT THE SOURCE · FIELD QUALITY CHECK

Dear Valued Buyer,

Thank you for taking the time to consider Holy Spices as a sourcing partner for your global spice and seasoning requirements. India produces some of the most aromatic, oil-rich and colour-intense spices on earth — yet quality at the buyer's port is decided by what happens long before loading: the field chosen, the moisture at harvest, the cleaning passes, the lab tests, the bag selected and the way the container is stuffed. We have built our entire enterprise around getting every one of those steps right.

From our base in Vadodara, Gujarat, we source from India's leading spice belts — cumin and psyllium husk from Unjha in North Gujarat, and chilli and turmeric from the growing regions of South India — and follow every lot closely from field to FCL. Before it ships, each consignment is checked for moisture, graded for purity and lab-tested to confirm it is free from adulteration. We do not chase volume; **we build trust**.

In this catalogue you will find our export portfolio, quality-control workflow, certifications and a clear order process; full technical specifications are available on request — everything you need to evaluate us as a serious long-term partner. If our specifications can be matched and verified against your needs, we are confident we can earn your first trial order.

We invite you to request a free sample or ask us any technical question. Your success is the only metric that matters to us.

With warm regards,

Kunal Gandhi

WHO WE ARE

About Holy Spices

At Holy Spices, we are a trusted link between India's fertile agricultural heartlands and the exacting requirements of the global food and manufacturing industries. Rooted in integrity and backed by strict export compliance, everything we do comes down to one promise: unadulterated, highly potent and precisely graded agricultural commodities, delivered to your port of destination.

We see spices not merely as trade goods, but as a living heritage of flavour, aroma and wellness — one that must be protected at every step, from the field to the final delivery. That is why every consignment is lab-verified, packed for ocean transit and shipped with complete export documentation.

Our Mission

Bring India's authentic, safety-certified spices to the global stage.

Our Vision

Pure spices, absolute consistency, trusted by premium global brands.
